BALLISTIC BODY ARMOUR

Concealable Ballistic Body Armour

Point Blank C-SERIES Level II and IIIA

Ballistic Protection Features (Level II and IIIA) NIJ Certified ballistic materials. Moisture Resistant - Body Sensor™ Comfort Mesh effectively releases moisture without absorption, allowing for higher evaporative cooling and faster drying. Easy Care - Removable Ballistic Panels allow convenient cleaning. Available in Princess Cut to accommodate a female's natural form while providing the optimal combination of comfort, fit and protection.

Options & Accessories;

- 5" x 8" Steel Trauma Insert
- Removable Cummerbund
- 4" Removable Waist Straps
- Blade Plates
- Additional Carrier
- Front and Back Shirt-tails
- R20-D Accessory Carrier

Point Blank Vision Level II and IIIA

Excess body heat and limited flexibility have been critical issues with ballistic protection until VISION™. VISION™ is the first Total Body Armor System that integrates Hi- Performance Ballistic Materials with an innovative carrier design featuring temperature regulating technologies, antimicrobial protection and exclusive Moisture Control System. These innovations result in significantly cooler, dryer and more comfortable all-day performance.

Options & Accessories;

- 5" x 8" Steel Trauma Insert
- Removable Cummerbund
- 4" Removable Waist Straps
- Blade Plates
- Additional Carrier
- Front and Back Shirt-tails
- R20-D Accessory Carrier

Point Blank Hi-Lite Level IIIA

Our commitment to product innovation has resulted in the re-engineering of the HI-LITE™ Proformance ballistic system, available in the new sleek and comfortable SS2 carrier.

Options & Accessories;

- 5" x 8" Steel Trauma Insert
- Removable Cummerbund
- 4" Removable Waist Straps
- Blade Plates
- Additional Carrier
- Front and Back Shirt-tails
- R20-D Accessory Carrier

BALLISTIC BODY ARMOUR

Tactical Ballistic Body Armour

Point Blank R20-D Level IIIA

This is ideal for law enforcement officers who have occasional equipment-carrying assignments. This vest can be used with ballistic panels from all three concealable vests, including VISION™, HI-LITE™ Proformance SS2, and C-Series. The standard version of this vest offers LII protection and GoldFlex as ballistic material but can be custom made if needed.

Point Blank Assault Level IIIA

This exceptionally lightweight, tactical vest is constructed of triple stitched, ultra-durable 1000 denier Cordura® outershell. Available with all Point Blank Level IIIA side-opening ballistic systems and rigorously tested to endure the rigors of training, the ASSAULT-1 offers the ultimate combination of protection, functionality and performance.

Point Blank Spider Level IIIA

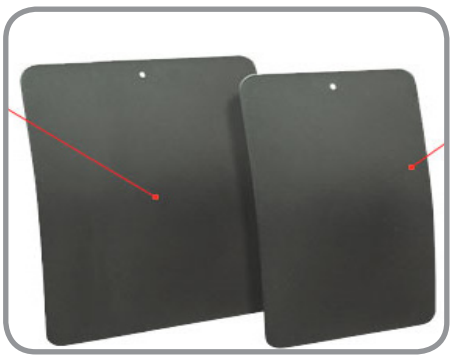
Designed to meet the ballistic protection needs of tactical forces, the SPIDER features the most frequently requested mission specific options - all in this fully integrated tactical entry vest, unparalleled in security, comfort and functionality.

Point Blank Dragon Fire Level IIIA

This performance driven, side-opening tactical vest offers exceptional mobility, resulting in absolute comfort and total edge to edge protection. Answering the strategic needs of your most critical missions, Dragon Fire's ballistic technology and exclusive Critical Contour Cut provides maximum coverage and maneuverability with split-second adaptability.

BALLISTIC BODY ARMOUR

Ballistic Plates



Steel Trauma Plate

Contoured for comfort. Finished with rubber coating to prevent spall.
Available in sizes;
- 5'' x 8'' fits all Point Blank concealable vest plate pockets
- 8'' x 8'' fits all Point Blank concealable vest plate pockets

Flexible Trauma Plate

Available in Spectra® or Aramid materials, or a combination (hybrid). Flexibility allows for contour to body.
Available in sizes;
- 5'' x 8'' fits all Point Blank concealable vest plate pockets
- 8'' x 8'' fits all Point Blank concealable vest plate pockets

Threat Level III Stand-Alone

Thickness: 1.0"
Weight by Shape:
- 10" x 12" Rectangle - 3.99 lbs.
- 10" x 12" Trapezoid - 3.50 lbs.

Additional Info:
- Multi-hit capability
- Defeats 7.62mm NATO 148 gr. (.308 caliber) FMJ at 2780 fps without additional ballistic support
- Maintains ballistic resistance after a strike face drop from 48" with a 30 lb. weight
- Also available in 8"x10"

Threat Level IV Stand-Alone

Thickness: 0.87" Nominal
Weight by Size: 10" x 12" - 9.4 lbs.
Additional Info:
- Multi-hit capability
- Defeats 7.62mm NATO 148 gr. (.308 caliber) FMJ at 2780 fps without additional ballistic support
- Capable of defeating .30 caliber armor piercing (AP2) rounds at 2850 fps without additional ballistic support

SECURITY EQUIPMENT

Batons & Knife Resistance Gloves

Bonowi EKA CamLock Expandable Batons

This baton is considered by many to be the world's best and most versatile expander baton. EKA CamLock is manufactured according to German police requirements and is a standard piece of equipment in the German police force. EKA CamLock has a mechanism in the cap which allows the user with a simple press of a button to retract the extended baton without having to drive the baton into the ground like standard expandable batons. Available in the sizes 16", 21" and 26".

ASP Expandable Batons

Tested and used by most elite Federal teams, the ASP Baton has proven itself ''virtually indestructible''. Easily carried and readily available, ASP Batons have an incredible psychological deterrence and unparalleled control potential. The premium materials, exceptional workmanship and flawless function set these batons apart from others in quality, durability and performance. ASP batons have super-strong aerospace alloy construction that makes them very sturdy and reliable. Available in the sizes 16", 21", 26" and 31".

GBB Security 21"

GBB Security 21" is a very reliable baton, made of steel of highest quality and is basically identical to the batons used by the Swedish police. This chrome baton is rust resistant and has a solid handle so that you get a sustainable and secure grip. A stylish and durable nylon clip is included.

TGS Enforcer Knife Gloves

TGS Enforcer tactical knife gloves are lined on the inside with 100% Spectra full knife protection, which makes this glove to an excellent service glove for both security personnel and other tactical groups.

TGS Master Knife Gloves

TGS Master features a 100% Spectra knit liner to protect against injury from sharp objects. The Spectra yarn is knitted into a glove liner, which is then sewn into a premium leather shell. This glove is cut resistant, and cut proof.

SECURITY EQUIPMENT

Portable Metal Detectors & Communication

Terascan ESH10 Portable Metal Detector

The Terascan ESH10 is considered as one of the best hand held detectors in the world, simple and portable (only 220g and 375mm) but still reliable and easy to use. It is capable to detect all concealed metallic objects including guns, knives, box cutters, jewels and even tiny electronic components. It is suitable for using at airports, seaports, banks, public buildings, stadiums, schools, hospitals etc.

Terascan ESW-618 Walk Through Metal Detector

Terascan is the world's most remarkable walk through metal detector for weapon detection and access control. Metal objects are consistently and accurately detected against harmless personal objects without interruption.

Zodiac Proline 400W Two Way Radio

With its small size, light weight and easy to use, Zodiac Proline is one of the foremost devices on the market of radio communication. With a memory of the radio that you can customise your radio with its own programming so it will be exactly as you want and you can use this in a major radio or the habitual talk-radio.

Zodiac Freetalk Pro Two Way Radio

With a strong clear sound, long range and operation, and durable housing, this model is for companies who want fast, secure communication on the field. The radio has 14 channels so the risk to be disturbed is minimal and you can usefully use this radio indoors even in spaces with concrete and thick walls. Zodiac Freetalk Pro can be purchase in packages up to 12 units.

Entel HX485 Two Way Radio

HX485 features rich and flexible communication in a compact ergonomically designed portable. Built to MIL-STD 810C/D/E/F specifications with a superior splash proof IP55 rating, its exceptionally loud audio will enable you to communicate even in the noisiest environments. Also includes FFSK signalling, variable point voice scrambler, channel scanning, shunting mode, personal attack alarm, whisper mode and lone worker features. GPS automatic location information, man down and Bluetooth options are also available.

SURVEILLANCE EQUIPMENT

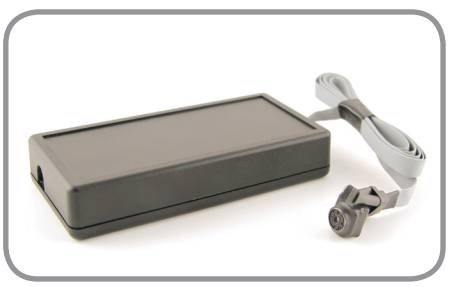
3G Audio & Video Surveillance

SW200P3G Surveillance Camera

By utilising 3G networks, the SW200P camera provides a unique tool for monitoring facilities. It incorporates a wireless 3G camera that works over any mobile telecommunication network wherever a 3G network is available. It does not require any wiring or internet connection therefore ideal for quick indoor installation. A sensor of your choice can be customised to work wireless with the unit to provide video calls to a pre-registered phone number when triggered. You can use SMS commands to remotely change setting, such as adding and deleting authorised callers, changing the PIN code and much more.

TGS3G Basic- 3G Covert Video & Audio Surveillance

This discrete camera is covertly installable into a host of devices, and by employing 3G technology, it provides a level of remote monitoring never available before. Compatible with any 3G SIM card, it is easy to set up and use – simply insert a SIM card and it is ready to use. Any number and type of sensors can be fitted to work with the camera wirelessly, providing image snapshots, short text message transfer and live video calls to pre-registered phone numbers.



TGS3G Ext - 3G Covert Video & Audio Surveillance

This is a 3G bug with an extended microphone and video camera connected by a 1m cable. This camera is covertly installable into a host of devices, and by employing 3G technology, it provides a top class level of remote monitoring. It is compatible with any 3G SIM card. Any number and type of sensors can be fitted to work with the camera wirelessly, providing image snapshots or short text message transfer, or even live video calls to pre-registered phone numbers.

TGS3G Clock - 3G Covert Audio & Video Surveillance

This discrete camera module is covertly installable into a host of a clock and by employing 3G technology which provides an unique level of remote monitoring. Compatible with any 3G SIM card it is easy to set up and use. Any number and type of sensors can be fitted to work with the camera wirelessly, providing image snapshots or short text message transfer, or even live video calls to pre-registered phone numbers.

TGS3G Radio- 3G Covert Audio & Video Surveillance

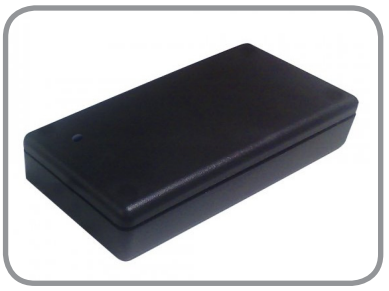
This discrete camera module is covertly installable into a host of a radio and by employing 3G technology which provides an unique level of remote monitoring. Compatible with any 3G SIM card it is easy to set up and use. Any number and type of sensors can be fitted to work with the camera wirelessly, providing image snapshots or short text message transfer, or even live video calls to pre-registered phone numbers.

SURVEILLANCE EQUIPMENT

3G Audio & Video Surveillance

TGS3G Vehicle - 3G Covert Video & Audio Surveillance

This is a compact and lightweight 3G camera that provides covert audio and video surveillance of vehicles through mobile phone wherever you are in the world. Hide and plug this inside the vehicle and when activated it provides video and audio surveillance through via phone calls, SMS, MMS and video calls to pre-selected number when the vehicle door is broken up (magnetic sensor), one is inside or outside the vehicle (motion detection) or when someone sits in the vehicle (pressure sensor). This means that the owner of the vehicle can monitor and control the vehicle, regardless of where the vehicle is.



TGS3G Rec - 3G Covert Video & Audio Surveillance

TGS3G Rec is a unique and innovative 3G-bug for audio and video surveillance and interception wherever you are in the world. It also enables recording the audio and video surveillance and stores it on the build in memory of 2GB. The user can directly either call the unit and through videoconference to see and hear what is going on. You can also monitor various sensors that automatically activates, through SMS, MMS or call the selected number when detection of motion, door openings, emergency button and much more.

TGS3G Pir - Bluetooth Motion Detector Sensor

TGS3G Pir is a motion detector that communicates with TGS3G cameras and activates them through Bluetooth. It is connected to a Bluetooth transmitter in the detection of movement and communicates with TGS3G camera via Bluetooth and then to pre-selected numbers to send SMS, MMS and video call the user directly on their mobile phones could see and hear everything that happens. TGS3G PIR is ideal for surveillance, both unmanned and manned.

TGS3G PM - Bluetooth Pressure Mat Sensor

TGS3G PM is a pressure mat that activates 3G cameras by Bluetooth when someone steps or sits on it. It is connected to a Bluetooth transmitter in the detection of movement communicates with TGS3G camera via Bluetooth and then to pre-selected numbers to send SMS, MMS and video call the user directly on their mobile phones could see and hear everything that happens.

TGS3G LB - Bluetooth Alarm Button Sensor

This is a small and compact Bluetooth sensor built into an alarm button to activate the 3G cameras in the area just by a touch of a button.When the alarm button is pressed, the 3G camera sends a SMS and call the guards in the building or area and through their mobile phones they can directly see and hear everything happening in the area. This system is very suitable for malls and stores.

SURVEILLANCE EQUIPMENT

CCTV

Apollo Series HD DVR

Apollo Series HD DVR is the first series in the world that plays video footage in High Definition (HD). This DVR has composite, HDMI and VGA output that can be connected to either standard or optional TV monitor. Apollo HD is a highly affordable, user-friendly and high quality DVR that can be used to monitor your home, business or other private areas. Apollo HD is available in 4 -, 8 - and 16-channel versions.

250 Gb-Colossus Lite Dedicated Stand Alone DVR med DVR-RW
CCTV Lite - Ett komplett övervakningssystem till ett ostaghart pris!
4st IR NightVision 20 CCD-övervakningskameror
17" LCD-skärm
4st 220V AC/DC adaptrar
8 st BNC kopplingar
50m Drum Coax Kabel

Apollo HD Lite Complete CCTV System

A complete and very user-friendly camera system with HD recordings. CCTV HD Lite camera surveillance system is a stable monitoring system adapted for many different situations, among others for the monitoring of companies, houses and many other areas and facilities. The system is available with 4 / 8 / 16 cameras.

Dedicated Colossus 4 Channel with CDR - 250Gig
1/3 Sony Super CCD 480TVL
15M Nightview 12pcs IR LED
17"TFT-Monitor
With Keyboard & Mouse &Power Lead
"Smple to install and set-up"
1 x 100m Drum Coax Cable
4XCamera PSUs
20xBNC-connectors
UPS

Apollo HD Pro Complete CCTV System

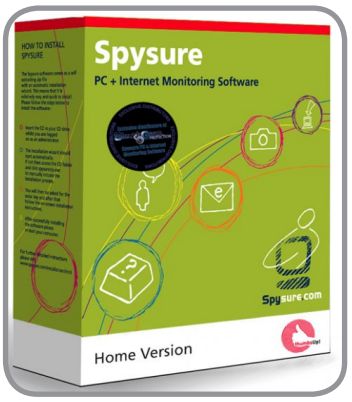
This CCTV PRO package combines our Sony Day / Night IR Cameras, 17 “TFT and UPS with our professional Stand-Alone DVR Colossus PRO. The system allows you to see and even hear everything (look at our other cameras with built-in microphone), even in total darkness because the cameras switch from colour to infrared mode (Black / White) as soon as the light level drops. This professional surveillance package fits our more demanding customers who want a stable and advanced monitoring system with many features. Is available in 4 / 8 / 16 cameras.

TGS Mobile Pro

TGS Mobile PRO is an integrated monitoring systems for vehicles.Its a camera surveillance system that includes an ultra-compact 4-channel DVR (MDVR4) and 2 discrete pinhole surveillance cameras. The DVR has the capacity to add two additional cameras allowing the user to further increase the surveillance of the vechicle if demanded.

SURVEILLANCE EQUIPMENT

Computer Surveillance / Covert Surveillance



Spysure PC & Internet Monitoring

Spysure is an innovative software for PC: s and designed to record, in secret, all computer and internet activity, both online and offline at any computer. Spysure combines several monitoring functions very simple and user-friendly meaning that the user of the computer with Spysure installed will be fully monitored and stored, but with discretion and covertly.

Spylogger Internet & PC Monitoring

Spylogger is a professional device that enables you to monitor the activity of a computer and user with absolute secrecy. You need access to a chosen computer for about 10 to 30 seconds and the spylogger will save all information about what the user was doing on his/her computer and will automatically erase the traces of your intervention.

PV500 / BU 12 Covert Audio & Video Recording System

This system combines the PV500 digital video recorder and button camera BU12. This video package can be used for hidden video / audio recordings in all situations. The camera can be hidden in any button or screw and audio and video can be monitored in real time.

PV500 / NT 12 Covert Audio & Video Recording System

This system combines both the PV500 digital video recorder and the tie camera NT12. This hidden video package can be used for hidden video / audio recordings in all situations. The camera can be hidden in a tie and audio and video can be monitored in real time.

CK4HD PRO Covert Audio & Video Recorder

This is an ordinary car key with integrated, high quality voice recorder and HD video recorder, manually or automatically. The user can use this in all situations, to record both video and audio stored in the built-in USB flash memory to 4GB. It can take high resolution still images and features VOX that means that it can be set automatically to start audio and video recording as soon as there are voices around - the user can place the device in one place and then let the recording begins as soon as a person enters in the field and talks.

SURVEILLANCE EQUIPMENT

Covert Surveillance

MiDVR8 Covert Audio & Video Recorder

MiDVR8 is a super compact and lightweight video and audio recorder. With its dimensions of 57 x 17 x 11mm and weighing only 15g, it is easy to carry, hide and use. Both audio and video recording are stored in a Micro SD memory with memory capacity of 2GB (Micro SD), which holds about 100 min video and audio.

DVRP1280 Covert Audio & Video Recorder

DVRP1280 is a pen with built-in audio and video recorder. The device records sound and video at very high resolution, 1280 x 960 dpi, and stores it in the built-in memory up to 8 GB. This spy pen is different from other pens with video recording on the market by being thinner (1.3 cm in girth) and the high quality of the recordings.

USBSpy Voice Recorder

USB Spy is an ordinary USB memory with a build-in voice recorder. The voice recorder is activated by a button and record all voices and sounds in the surrounding environment. It also functions as an ordinary USB memory stick so it makes it impossible to detect. The high-quality voice recordings are stored in memory (2 GB) and carry 40 hours of recordings and the rechargeable battery last up to 4h. *NOTE: USBSpy is a USB flash disk of different model than the USB stick that is in the picture, so in order to avoid any familiar model when it is used.*

Denpa VD200 Voice Recorder in Credit Card Form

Denpa VD200 is an extremely compact and thin voice recorder that can be hidden almost anywhere. It has the same dimensions as an ordinary credit card and can be placed in a wallet while recording all voice activities. It has a built-in USB connection to be connected to any computer to transfer the recorded audio files. It also has a built-in speaker and headphone input, so that voice conversations can be listened to directly, if desired.

VT50 Digital Voice and Phone Recorder

This device is a highly advanced voice recorder and includes a telephone adapter to connect to a telephone (both fixed and wireless), and certain types of mobile phones and video input / output calls. VT-50 has built-in VOR (Voice Operated Recording option), which means that it can be set to automatically record when sound is present (including telephone calls) as this saves battery power and memory as it goes down to idle mode when audio is not present. A small wireless microphone can be purchased to record conversations up to 60m distance. Available in 550 h/2GB and (1120h)/4GB.

SURVEILLANCE EQUIPMENT

TOPGUARD SECURITY

GSM Surveillance

GSM Global Ear Lite

The Global Ear Lite is 1” by 1” in size can be easily hidden anywhere. GSM Global Ear Lite is fitted with a standard SIM card and when the user sends an SMS to the bug, the bug will recognise the user’s number and turn on the interception function. It can be easily activated though SMS from your mobile phone, enabling you to monitor conversations from anywhere in the world. It also has a voice detection feature that dials out to the pre-registered numbers to allow remote monitoring.

GSM Ear PRO

GSM Ear Pro works from an unlimited distance and weight only 20g and size of 38x35x10 mm. Up to three numbers can be programmed simple through instructions sent via SMS, to monitor the area to be called by the same audio transmitter when the sensor detects the presence of voices in the surrounding area. It allows you to hear background noise from any distance by dialling the number of the SIM card inserted inside and alerts you with a phone call (VOX Circuit) when it hears a sound or voice, so that you can safely listen, without anybody realising.

GSM Ear Advanced

Weighing just 40 g with dimensions of only 52x39x17 mm, the GSM Ear Advanced takes advantage of a cutting-edge technology making it a highly versatile and valuable product. It can be programmed from a distance through simple instructions sent via SMS. Up to three numbers can be programmed to monitor the area or set in order to be called by the same audio transmitter when the sensor detects the presence of voices in the surrounding area.

GSM Ear Extension

This bug can be dialled from an ordinary mobile phone and intercept area where its placed while working as a regular power strip. As the power strip coupled to a wall outlet, GSM Ear Extension does not need to rely on a battery; it is turned on continuously since the outlet supplies the bug with power. It is equipped with a standard prepaid card; the user sends a text message to the bug so the bug will recognize the user’s number and only turn on the interception function when calling the number. GSM Ear Extension has a built-in, super-sensitive microphone, resulting in clear interceptions.

GMC38 Calculator GSM Bug

This unique GSM bug the user simply dials and monitors the area where this is located in or choose to drive yourself call any cell phone / telephone upon discovery of the votes in a 10m-radius (adjustable). Thanks to the built-in sound sensor, interception can take place automatically only when a conversion is nearby. Due to its appearance, it can be placed almost anywhere without arousing suspicion, the battery life is at 35 days (standby) and it is almost impossible to detect the built-in bug unless you screw up your device and open it.

SURVEILLANCE EQUIPMENT

Listen through Walls

F-555 High Performance Wall Microphone

The F-555 is one of our most advanced wall microphone and has a multi functional wall contact microphone that can be used as a wall contact microphone and as a wired remote microphone. One of the characterising items is its highly sensitive needle microphone. This needle microphone consists of a wired microphone and a needle that can interception by half a meter thick concrete wall is made without any problems. F-555 comes in two versions; the second version, the F-555EX, includes a microphone with 25 m long cable for eavesdropping from a distance.

F-999R Super Sensitive Wall Microphone

F-999, the flagship of our wall contact microphone line-up, is now improved in stability of the amplifier circuit and in durability of the board. The sensitivity of the microphone is very high, it enables to filter out certain sounds, and voices to increase the strength of the second display so that you get the best quality at the desired interceptions are possible. F-999R is undoubtedly the wall microphone for those who want the absolute best and most advanced in the field.

USK40/UZ10 Wireless Wall Microphone

This unique surveillance system allows the user to intercept conversations taking place across a wall 600m away. The user puts the wireless microphone against a wall (concrete, wood, bricks, cement) and can detect from an entire 600m distance the conversations taking place on the other side of the wall. The microphone is very compact and can be easily hidden and attached in the facade at any time. The UZ10 receiver can be connected to a digital voice recorder, for example VT-50, and record all the conversations.

SWK300 Supercompact Wall Microphone

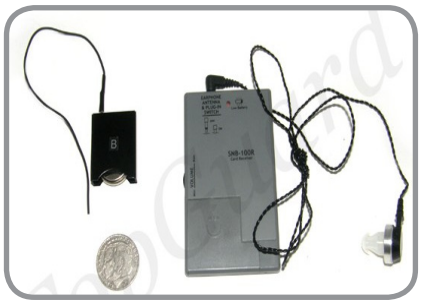
This advanced wall microphone can listen through up to 60cm thick walls. The user can simply place the hypersensitive feelers against the wall and then hear any sound on the other side of the wall. SWK300 have input for audio so that a digital voice recorder (like VT-50) can be connected and record the conversations. Thanks to its extreme compact size it can be taken, hidden, and used at anytime. A magnetic disk is included to attach the microphone onto walls while listening.

SURVEILLANCE EQUIPMENT

Radio Audio Surveillance

Piccolo UHF Bugging Kit

The receiver is powerful and extremely compact, only 64 x 25 x 13mm, and can intercept the entire 600m away from the bug. The bug (bug TX-40) is also very small, 33 x 18 x 23mm, and has a interception radius of 10m. The bug can be hidden almost anywhere and pick up calls that it then sends to the powerful receiver in turn, recording those conversations or play them directly. The receiver has three channels (A, B and C), and can intercept three different transmitter / bugs placed in three different locations.



Shinobi UHF Bugging Kit

Shinobi packet interception is the most innovative and professional UHF interception system, consisting of Shinobi 100R receiver and Shinobi transmitter 400 (Shinobi 300 and 500 also available). This is the world's smallest commercial bug receivers and transmitters. The transmitter Shinobi 400 weighs only 7g (10g incl. Battery) and is so small it can hide almost anywhere without fear of detection. It has an effective radius of 15m eavesdropping and detects slightest whisper and sends it to the recipient.

USS100/PP400 UHF Bugging Kit

This bug package contains a powerful but extremely compact USS-100 bug UHF receivers and a dense PP-400 UHF bug that can hide almost anywhere and is powerful enough to send a call, several hundred feet away with crystal clear results. It is a very stable, powerful and professional bug system for both individuals and businesses.

USP100/PP400 UHF Bugging System

This bug package contains a powerful USP-100 UHF bug receivers with built-in speakers and an ultra-compact PP-400 UHF bug that can hide almost anywhere and is powerful enough to send a call, several hundred feet away with clear results. It's a very stable, powerful and professional bug system for individuals and businesses.

SURVEILLANCE EQUIPMENT

Spy Phones

Mobile Guard Spyware for Mobile Phones

Mobile Guard is a spy software for mobile phones that monitors and copies of all incoming / outgoing SMS and MMS, list of all outgoing / incoming calls and provides GPS location of where the mobile phone or the user was when the call was made or whenever the supervisor wants. This gives the supervisor complete control of the mobile phone. Mobile Guard make sure that you can find your mobile phone if lost or stolen.

Interceptor Symbian Spyware for Mobile Phones

This mobile spy software for Symbian based mobile phones is unique and a major technological development compared with the former spy software for mobile phones. Besides the ability to hear voices around the phone and log in to a call made by spy phone, they also receives a copy of every SMS sent / received by the phone. Several spy features can also easily be changed by sending commands hidden by SMS to the spy phone without the user of the phone spy suspect something.

Interceptor Symbian PRO Spyware for Mobile Phones

Interceptor PRO is the latest and most revolutionary spy software for mobile phones. It allows the interception of all mobile calls and SMS/ MMS traffic made with the spy phone but also automatically and records all calls made and all other calls that occurs with the phone without the user is aware of this. This means that the Interceptor PRO allows active and inactive, covert interception of mobile phone, both mobile phone use and when not in use at all. This is done by an optional code (spyware issue) sends a command to the spy phone (done only once), which then stores and recognise this spy codes, thereby ensuring that go into the spy phone mode when this specific number to send SMS or call the spy phone. The spyware can be installed in any mobile phone using Symbian operating system.

SURVEILLANCE EQUIPMENT

Wireless Video & Audio Surveillance

CA1205 Wireless Camera

CA 1205 is a super-compact, high-resolution professional 1.2 GHz wireless camera that can be hidden almost anywhere. It records both audio and video and sends it up to 300 meters away to a receiver (for example PVR 800CX) to store it. CA1205 has a design that makes it blend in anywhere and is extremely easy to conceal. Image and sound quality is extremely high and better than any other wireless camera of the same size on the market. The coating is composed of magnesium-aluminium that reduces heat radiation, which makes it harder to detect and gives the camera a high impact resistance and water resistance.

CA2405 Wireless Camera

CA 2405 is a super-compact, high-resolution professional 2.4 GHz wireless camera that can be hidden almost anywhere. It records both audio and video and sends it up to 300 meters away to a receiver (for example PVR 800CX) to store it. CA2405 has a design that makes it blend in anywhere and is extremely easy to conceal. Image and sound quality is extremely high and better than any other wireless camera of the same size on the market. The coating is composed of magnesium-aluminium that reduces heat radiation, which makes it harder to detect and gives the camera a high impact resistance and water resistance.

PVR1000CK Wireless and Powerful Reciever

This is the next generation of professional portable video and audio recorder with built-in receivers for both wired and wireless cameras (both 2.1 and 2.4Ghz), 60GB HD and built-in support for SD / SDHC memory cards. PV1000CK is different from its predecessors by recording the much higher resolution, up to 1280 x 960 in real-time. The entire unit is constructed through a modular system that allows users to build and scale it, thus adapting the device for the purpose it is used. This gives enormous flexibility and customisation that you cannot find anywhere else.

PVR806CK/CA2405 Wireless Surveillance System

This unique system combines PVR806CK digital recorders with wireless and high-resolution camera CA2405. The user can remotely monitor a hidden field by placing up to 16ST cameras, see, and record sound and pictures on PVR806CK, equipped with wireless receiver and built-in 60GB hard drive (including input for 32GB SDHC memory card). PVR806CK picks up the wireless signals from virtually any wireless 2.4 and 1.2 GHz cameras available on the market that means that the user can use their own, already existing wireless cameras wireless. Many agencies and companies that want the very best equipment for mobile, wireless audio and video surveillance use this system.

COUNTER SURVEILLANCE

Detctors

Bug Chaser Plus

Bug Chaser Plus is the dual mode detector with alarm function and receiving function. Electronic sound alarm and LED meter helps you to narrow the distance between you and hidden bug. It is a dual function, electronic sound alarm synchronized with LED meter helps you to locate hidden bug. Switches and buttons are kept at minimum, which makes it user-friendly. Anyone can handle it without effort.

RF55U8 Pro Bug Tracker

This is our latest signal detector, detecting bugs, hidden microphones, cameras and active GSM phones. Users can set the sensitivity to discriminate against other products that emit frequencies. Detection can be made in several ways, through vibration, LED indication, alarm or through the supplied headphones

Bug Pinger

Bug Pinger is triple mode detector with a new function, pinger mode which works like a sonar of a submarine. Bug Pinger gives out cracking sound, the hidden bug picks up this sound and sends it to the air and the Bug Pinger picks up the radio wave from the bug again. While operating this cycle, the Bug Pinger calculates the distance between itself and the hidden bug.

SH055UR

This device can detect the popular wireless CCTV camera, wireless phone, wireless bug and cell phone for frequencies between 50MHz~6.0GHz. It is equipped with 10 LEDs; when it detects a peeping camera or cell phone, the LEDs will light from Green to Yellow to Red, and the beeping sound will change from slow to rapid indicating the strength of detected signal.

CPM-700 Counter Surveillance and Monitor System

This is the latest and most effective complete system in the anti-bugging, both for individuals and businesses. It provides a complete scan of hidden cameras, surveillance products, wireless phones, radio and other types of transmitters, nothing gets past this system.

COUNTER SURVEILLANCE

Detctors

SH055 Detector

SH055 is a powerful signal detector that detects and warns against the use of GSM, 3G and wireless cameras (50 MHz - 6.0 GHz). It can detect illegal use of mobile phones, GSM wireless cameras and bugs within 20m radius of a large area or building. SH055 is an effective measure against unauthorized use of GSM bugs, wireless cameras and the use of mobile phones and intercepting them. The device is CE marked and 100% legal address hold and use worldwide. Applications are laboratories, hospitals, conference rooms and other areas where the above mentioned frequencies are not allowed.

SH055UFK GSM & 3G Detector

SH055UFK is a powerful and professional GSM and 3G detector with a detection radius of 20m; it detects the frequencies 800, 900, 1800 and 2100MHz. This unit looks at protecting major buildings and rooms for unlawful use of mobile phones. When the interception of mobile phones and GSM bugs is detected signals howls, a voice warns of detection of these frequencies, and shines brightly up a large acrylic sign that warns for frequency detection in the field.

NJE-4000

ORION (The Great Hunter) provides the capability to detect hidden electronic devices, regardless of whether the device is radiating, hard wired, or even turned on at all! ORION is the latest advancement in Non-linear Junction Detection and evaluation for Counter surveillance.

Oscor 5000E

The Oscar provides the most reliable and cost effective capability in the industry, including detection of sophisticated transmitters. Oscor is a microprocessor controlled counter surveillance system with a custom designed built-in spectrum analyzer that can operate automatically storing all encountered signals and spectrum traces in memory for later review and comparison. Designed to detect all major types of audio and video RF transmitters (even frequency-hopping, burst/ packet, and spread spectrum), including carrier current and infrared.

Detectors

DPA 7000 Talan Telephone and Line Analyser

The NEW TALAN Telephone and Line Analyzer provides a complete integrated suite of tools to analyse, inspect, and test digital telephone lines and other wiring for bugs, transmitters and other intercpetion devices. The TALAN incorporates several types of telephone line tests including common tests such as voltage, current, resistance, and capacitance tests, as well as NEW technology such as line NLJD, FDR Frequency Domain Reflectometry, and Digital Demodulation into a single piece of equipment. The TALAN represents a new breakthrough in telephone line testing. There currently is no other product available with the same capabilities.

CMS11 / TD53 Complete Debugging System

The set is built around the TD-53 Advanced Transmitter Detector and consists of the following items:
TD-53 Advanced Transmitter Detector
P-02 INFRARED (IR) PROBE
P-03 LINE DRIVER
P-04 CARRIER CURRENT/VIDEO

COUNTER SURVEILLANCE

White Noise Generators / Jammers

White Noise Generator 2200

By sending a constant flow of white noise, external eavesdropping equipment such as laser/ microwave phones, wall microphones and bugs will be disturbed and not able to intercept to the area where the White Noise Generator 2200 appears. The system can be activated continuously or only when the user wants to ensure that sensitive information is not intercepted. The system can be customized so that larger areas and surfaces are protected with the target speaker and transmitter injection as directed and inject white noise into walls, ventilation systems and windows.

PNG200 Portable White Noise Generator

PNG200 is a portable white noise generator that disguises voices and to make it impossible for external bugs to intercept a room. The system can be activated all the time or when the user wants, to ensure that sensitive information is not intercepted. PNG200 can be connected to several speakers and the target injection transmitter so that it can cover large rooms and also target signal against various corners.

MJ40 Triple band Jammer for GSM & 3G networks

This advance cellular jamming device utilises unique and intelligent technique that interferes the linkage between cellular handset and cellular base station by very low power radio signals. This ensures a cellular phone communication free environment for desired period and control compound or avoid information being disclosed secretly during meetings. It is easily operated and user-friendly - a DIY designed device to suit everyone, everywhere and anytime.

MJ40P Portabel Jammer for GSM & 3G Networks

This advance cellular jamming device utilises unique and intelligent technique that interferes the communication between cellular handset and cellular base station by very low power radio signals. It blocks all cellular phone communication and ensures a cell phone free environment in your controlled area. It ensures a safety or quiet zone while jamming silently without cellular phone users‘awareness. This device is designed for outdoor special mission use. It is portable power supplied by standard motorcycle battery in replaceable battery pack. With pre-charged battery packs, user can replace the battery pack in a minute when the battery runs down.

COUNTER SURVEILLANCE

Cryptophones

PhoneCrypt Symbian - 1 & 3 years license

PhoneCrypt is advanced, 256-bit AES encryption software for Symbian based mobile phones. PhoneCrypt encrypts the call between two mobile phones and make it impossible to listen for any agency or company in the world. Today there is no equipment in the world that can decrypt the AES 256-bit encryption, in fact it is the armed forces and agencies around the world the use of this encryption in data communication and telephone communications. PhoneCrypt is easily installed in mobile phone to use and easy thanks to the extremely user-friendly interface. PhoneCrypt is available in 1 or 3 years licenses.

PhoneCrypt Iphone - 1 & 3 years license

PhoneCrypt is advanced, 256-bit AES encryption software for Iphone mobile phones. PhoneCrypt encrypts the call between two mobile phones and make it impossible to listen for any agency or company in the world. Today there is no equipment in the world that can decrypt the AES 256-bit encryption, in fact it is the armed forces and agencies around the world the use of this encryption in data communication and telephone communications. PhoneCrypt is easily installed in mobile phone to use and easy thanks to the extremely user-friendly interface. PhoneCrypt is available in 1 or 3 years licenses.

PhoneCrypt Windows- 1 & 3 years license

PhoneCrypt is advanced, 256-bit AES encryption software for Window based mobile phones. PhoneCrypt encrypts the call between two mobile phones and make it impossible to listen for any agency or company in the world. Today there is no equipment in the world that can decrypt the AES 256-bit encryption, in fact it is the armed forces and agencies around the world the use of this encryption in data communication and telephone communications. PhoneCrypt is easily installed in mobile phone to use and easy thanks to the extremely user-friendly interface. PhoneCrypt is available in 1 or 3 years licenses.
